

## Yemen: Increment of Trademark Fees in Aden

The concerned authorities in Aden, Yemen, have recently decided to increase the official fees for trademark-related procedures and services. This decision has been effective since April 28, 2024.

It may be noted that no formal written communication has been issued or made by the concerned authorities in this regard. It was only during our routine interactions with the officials that we were orally informed about the revision in the official fees.

Axiom Mark IP has chosen not to increase its service fees for any IP related services provided in Aden, Yemen, in spite of the change in official fees.

**Note:** The aforementioned revision has absolutely no effect on the official fees in Sana'a, Yemen, which remain unchanged.
